

We are Leaders in
**High Temp
Medical**
Sterilization Packaging

For proven performance in critical healthcare environments, M&Q Packaging leads the way in the development and production of high temperature sterilization packaging products for medical and dental facilities.

When superior puncture, abrasion or high heat resistance is critical, M&Q's nylon film is the clear choice. Perfectly suited for cleanroom film applications, M&Q's film is made from FDA approved grade A resins and are produced with adherence to special conditions to ensure these films meet class 100 standards.

M&Q's polyamide sterilization bags and films are:

- specifically designed for steam and dry heat autoclaves
- extremely durable to protect sensitive medical instruments from sterilization through use
- available in tube stock or pouches for greater flexibility

Features & Capabilities

- **Withstands heat up to 400°F.**
- **High Puncture, Abrasion and Chemical Resistance**
- **Transparent films for easy visibility**
- Available in lay flat tube stock in widths as narrow as 2"
- Pouch sizes available from 2" to 54" wide
- Uses FDA approved Grade A resins
- Meets class 100 standards
